Dear Sir/Madam,

Re: Front End Developer

I would like to apply for the position of Front End Developer and I am available to start work.

I am a highly motivated developer with a keen eye for details. With over 8 years of experience working as a developer. I have worked in teams of various sizes from simple static websites to complex dynamic web applications, using HTML, CSS and Javascript as my tech stack, while leveraging the power of frontend frameworks and library like Angular, NgRx, React, Redux, Typescript, NextJs, Material UI, Angular Material, TailwindCSS, Jest, React Testing Library, Jasmine, Karma to work effectively.

As a team player I work closely with UI/UX designers, backend developers, testers, business analysts and product owners to achieve a common goal by ensuring we deliver quality, well tested and maintainable products to our customers.

I would like to apply for this role because I am looking for new challenges. As you can see from my CV, I have a wide range of experience from working on projects of all kinds from planning through to production release stages. I am always looking to learn more and I know I will quickly become an asset to your company.

Thank you for taking the time to look at my application and I look forward to hearing from you.

Yours faithfully,

Akoji Agoh.
